Dear Sir:

On Wednesday, 09-28-05, my wife and I were driving north on the Florida Turnpike in Osceola County when I was stopped by Trooper Eugene Brewer, ID No. 0769, for speeding. I told Trooper Brewer that I was not concentrating on the speed and that I was sorry for speeding. I explained to him that we were on our way to Gainesville to be with our daughter who had been in a car accident the day before. I explained that she was taken to Shands Medical Center by ambulance and that she sustained multiple fractures to her right hand-wrist-forearm. He realized that we were parents in a very stressful situation and rather than give us a ticket for speeding, he gave us a warning notice instead and reminded us it is more important for us to be there for our daughter than to worry about the ticket.

Trooper Brewer's obvious concern for us and our daughter's well being is greatly appreciated. He is an asset to the FHP and all law enforcement.

Sincerely,

Richard Reiner

P.S. My daughter is doing well and will only miss one week of school.
